

## Specification

*BotaniX* is our original range of over 240 high quality extracts from herbs, plants, flowers and fruit: carefully selected over time to satisfy formulators' basic needs. The continuing popularity of these extracts means fast provision of data from specifications to application, and regular production scheduling means fast delivery. Information on all of the *BotaniX* range of extracts can be found in greater detail on our dedicated botanical website: [www.botanicalsearch.com](http://www.botanicalsearch.com) where samples can be requested online and specifications and MSDS's can be downloaded.

Alternatively specific attributes and functions for many of the extracts can be found in the JARVIS publication "Guide to Botanical extracts".

If you do not find what you require within our *BotaniX* range, please refer to our data sheets for the *OrganiX* range (organic extracts) *FlowerX* range (gentle botanical waters) and *ActiveX* extracts (with greater activity) for alternatives. If the extract(s) you need are not covered in any of these ranges please see our *SpecifiX* sheet to learn about having extracts tailored to your exact need.

## Strength

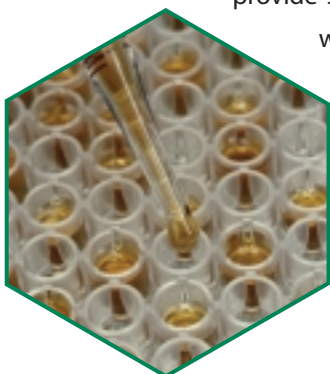

At JARVIS, we produce extracts to optimum strength for addition to toiletry and cosmetic products. The precise strength ratio of each extract is clearly specified as a herbal equivalent in the product specification sheet.

## Quality

*BotaniX* extracts are thoroughly tested and prepared to the highest standards of quality control. Our procedures are covered in greater detail in "An Introduction to JARVIS Botanical Extracts".

## Samples and Delivery Schedules

We recognise that formulators need a quick response to their requests. In line with this we aim to provide samples within 48 hours of request, along with all data sheets for those who cannot benefit from the download facilities of [botanicalsearch.com](http://botanicalsearch.com)
