

Specification

A range of pure organic extracts, produced from 100% organic growths. The materials are certified to warrant that their growth has never been 'contaminated' by any chemical fertilisers, weed killers or pest control. Our suppliers work to the highest standards of organic husbandry to ensure a bountiful supply of the richest products. However, plantings are more susceptible to natural hazards and, thus, continuity of supply cannot always be guaranteed. Experience has shown us that, providing we can arrive at a reasonable forecast of the quantity sought, future supplies can be met.

Quality

OrganiX extracts are thoroughly tested and prepared to the highest standards of quality control. It should be noted that, because of the purely natural method of growth, consistency of colour cannot be maintained from crop to crop and some fluctuation may occur. This, normally, has not presented a problem to users, but it is a consideration to remember in organic formulation. Our quality procedures are covered in greater detail in

"An Introduction to JARVIS Botanical Extracts".

Samples and Delivery Schedules

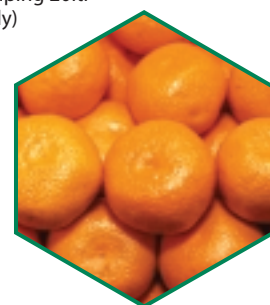

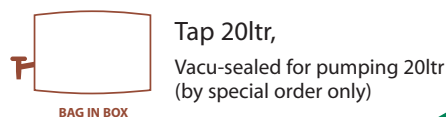

We recognise that formulators need a quick response to their requests. In line with this, we aim normally to provide samples and literature within 48hrs of request. With *OrganiX*, however, there may be a slight delay, while we check availability or obtain sources.

All *OrganiX* extracts are made to order. We aim to process and deliver within two weeks to most parts of the world. For some popular *OrganiX* extracts, where production is more regular, we can sometimes provide delivery within one week.

Strength

At JARVIS we produce extracts to optimum strength for addition to toiletry and cosmetic products. The precise strength may fluctuate from time to time, depending on the crop. However the ratio of each extract is clearly specified as a herbal equivalent in the product specification sheet.

Packaging

Our Range

The range of *OrganiX* extracts varies from time to time, influenced by fluctuating growth patterns around the world. Please contact us for specific availability or visit our website www.botanicalsearch.com. We will usually be able to meet your requirements.

Common Name	Binomial Name	AQUEOUS	GLYCERIN	ALCOHOLIC	TINCTURE	HYDRO GLYCOLIC
Av strength		1:5	1:5	1:10	1:10	1:5
All Spice	<i>Pimento Officinalis</i>			*		
Almond	<i>Prunus Dulcis</i>	*				
Almond Blossom	<i>Prunus Dulcis</i>	*				
Aloe	<i>Aloe Barbadosensis</i>	*				
Apricot	<i>Prunus Armeniaca</i>	*				
Arnica	<i>Arnica Montana</i>		*		*
